

United Nations Peace Pledge

Dear Members of Planet Earth,
 Secretary-General Ban Ki-moon,
 Members of the United Nations,

We are members of this world. Are we not all members of the same family - homo sapiens? Is our family able to survive another World War? - We do not think so. Therefore, it makes sense to us not to have any war, which may lead into a world war.

Let us all on our beautiful Planet Earth sign petitions and make public pledges that we each, as sovereign individuals, will not ever join an army. We, as sovereign individuals, refuse to be ordered to kill. Each and every decision we will make individually as sovereign members of Planet Earth. We therefore pledge:

**"We are Peace Prophets.
 We will never kill a brother or sister human being.
 We believe only the creator of that human life has
 the right to end that life."**

United Peace
 Pledge
